

Write one benefit (not listed above) that you have realized from being physically active.
<ul> <li>Control your weight</li> <li>Reduce your risk of disease (cardiovascular, diabetes, etc.)</li> <li>Reduce your risk of some cancers</li> <li>Strengthen your bones and muscles</li> <li>Improve your mental health and mood</li> </ul>
Here are some of the benefits of being physical activate, but there are many others.
<ul> <li>It was fun</li> <li>I was very tired afterward</li> <li>I had tons of energy afterward</li> </ul>
Check any or all of the general statements that were true about the last time you exercised:
<ul> <li>I'd like to get stronger</li> <li>I'd like to have more muscle tone</li> <li>I'd like to be able to run farther</li> <li>I'd like to learn a new sport or activity</li> <li>I'd like to be active for 60 minutes every day</li> <li>I'd like to improve my diet by eating healthy foods</li> </ul>
Rank your top three goals for personal fitness (put a "1" by your top goal, then "2," and "3")
Describe how you would feel:
Describe what you would look like:
If you were able to reach an optimal fitness level
Fitness is the overall term that we'll be using to describe a journey to optimal health and well-being. Like all great journeys, you'll need a map to guide your way. This personal portfolio will be that map. We'll blend this work together with regular physical activity and healthful nutrition habits to help you reach your goals.

What did you do to raise your HR?	<u>Exercise HR</u>	<u>Ambient HR</u>	Trial
Heart rate during exercise is an indicator of intensity. In other words, it can tell you how hard you are working. During exercise, your heart rate will depend on several things: 1) the intensity of exercise, 2) your fitness level, and 3) your maximum heart rate. Have someone keep track of time so that you can accurately record your heart rate. Your <b>Ambient Heart Rate</b> is the rate at which your heart normally beats during the day when you're not being physically active. Your <b>Exercise Heart Rate</b> is how fast your heart beats during or immediately after exercise. <b>Use the table below to experiment with activities that can increase your heart rate</b> .
